2023 Physical Activity Council’s Overview Report on Participation

The Physical Activity Council’s Annual Study Tracking Sports, Fitness, and Recreation Participation in the U.S.
Participation Data

All participation statistics were derived from an annual online consumer-tracking study focused on participation conducted during the 2022 calendar year by Sports Marketing Surveys USA (SMS) A Buffalo Groupe Company. SMS designed the participation questionnaire in collaboration with the Physical Activity Council (PAC), consisting of eight sports industry associations. SMS retained Digital Research International (DRI) to program, field, and manage the survey.

Sample Specification

During 2022, a total of 18,000 online interviews were carried out with a nationwide sample of individuals from U.S. proprietary online panels representative of the U.S. population of people ages six and older. Strict quotas associated with gender, age, income, region, and ethnicity were followed to ensure a balanced sample.

The 2022 participation survey sample size of 18,000 completed interviews provides a high degree of statistical accuracy. All surveys are subject to some level of standard error—that is, the degree to which the results might differ from those obtained by a complete census of every person in the U.S. A sport with a participation rate of five percent has a confidence interval of plus or minus 0.32 percentage points at the 95 percent confidence level.

A weighting technique was used to balance the data to reflect the total U.S. population ages six and above. The following variables were used: gender, age, income, ethnicity, household size, region, and population density. The total population figure used was 305,439,858 people aged 6 and older.

Activity reporting is based on a rolling 12-month participation rate. All charts represent data from U.S. population aged 6 and over, unless otherwise specified. If you have specific questions regarding the methodology, please contact Sports Marketing Surveys USA at info@sportsmarketingsurveysusa.com.

Notes

Please note that some information includes data that was collected during previous surveys, as some questions are not asked every year.
Youth Interviews

All interviews of children under 13 were carried out following the guidelines set out in the Children's Online Privacy Protection Act of 1998 (COPPA). No children were contacted directly. The panel is a balanced sample of households with children in each age group, but contact is always made through designated adult panelists. The adult panelist receives the survey invitation on behalf of a specified child, age six to 12, and they are asked to complete the survey together. Respondents ages 13 to 17 are contacted in a manner similar to respondents ages 6 to 12, but they are asked to complete the survey themselves.

Quality Assurance – Multiple levels:

- Respondent are prevented from taking the survey again within 3 months.
- Our panel provider has a suite of technology platforms to prevent fraud
- Technical fingerprinting to eliminate duplicates
- LOI offense checking (to eliminate “speeders”)
- Pattern response checking
- Internal QA questions e.g. colors of the American flag
- Internal consistency checks e.g. a limit on the number of total participation days
- Open-end response quality algorithm
- Ongoing response visual checks.

About the Physical Activity Council (PAC)

The survey that forms the basis of the 2023 Participation Report is produced by the Physical Activity Council (PAC), which is a partnership of leading organizations in the U.S. sports, fitness, and leisure industries. While the overall aim of the survey is to establish levels of activity and identify key trends in sports, fitness, and recreation participation, each partner produces detailed reports on specific areas of interest. Partners include Outdoor Foundation (OF); National Golf Foundation (NGF); Snowsports Industries America (SIA); Tennis Industry Association (TIA); USA Football; United States Tennis Association (USTA), International Health and Racquet and Sportsclub Association (IHRSA), People for Bikes, and the Sport and Fitness Industry Association (SFIA).
